Detailed Description of Use:
<p>Felt Board is a wonderful app for young learners. It is easy to use, as students can spend time playing around with the app in order to better understand all that it can do. I have seen this used as a way to showcase simple content for students, such as adding felt pieces that deal with the seasons. I have also seen this app used to address individual Letterland letters with images that show beginning sounds.</p> <p>As described in the Apple app store: Design scenes, dress up characters and let your imagination soar as you invent your own stories with Felt Board. Especially designed for imaginative play, storytelling and learning, Felt Board is perfect for children, families, teachers and therapists. Create characters by selecting skin color, hair and facial features. Choose from a wide variety of costumes, settings and props for hours of magical make believe play. And because it is an app, the pieces will never get lost.</p>
