Detailed Description of Use:
<p>Quizlet is a web-based platform that helps students study information. Teachers can either create a review activity from scratch or they can search for previously created review activities to copy. The quizlet can be shared easily, for example it can be assigned in your Google Classroom, a link can be sent through Remind, or the vocabulary terms can be found via a QR code. The students can practice on their own and there are a couple of game options. In the live mode (game mode), students have the ability to practice their academic conversations.</p>
